

Thermodynamic feasibility per design ($T_{\text{steam}} = 120\text{ }^{\circ}\text{C}$)

R1270/R600

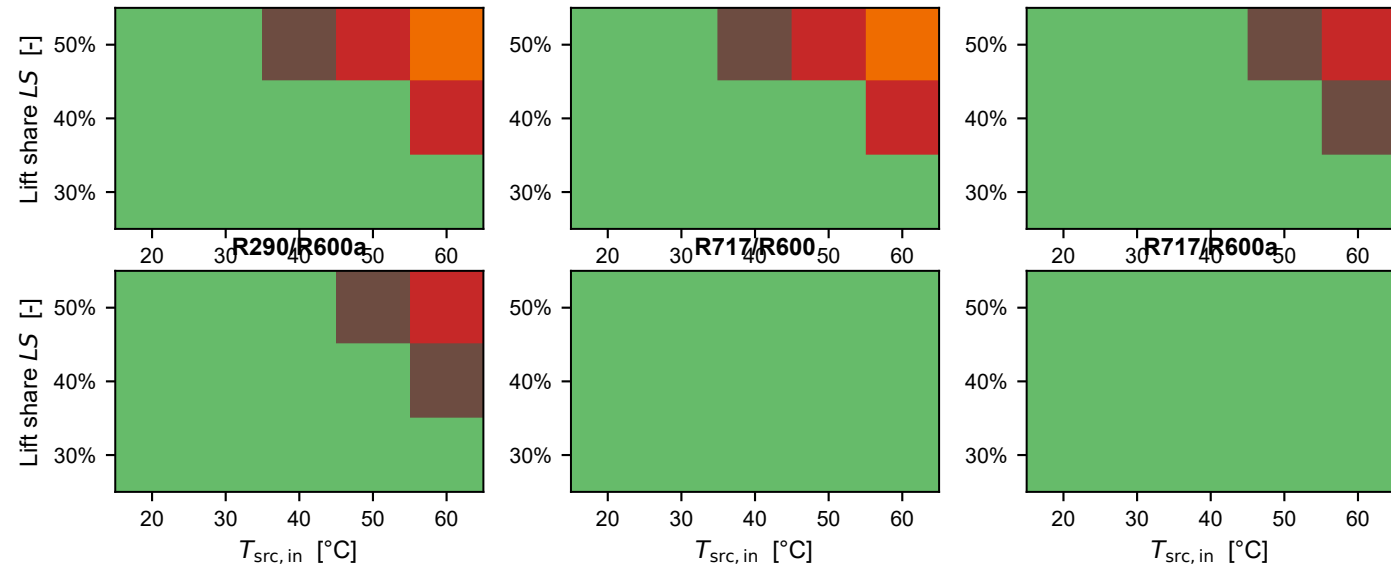

R1270/R600a

R290/R600

R290/R600a

R717/R600

R717/R600a

- feasible (thermo OK)
- $T_{\text{crit_c1}}$ (cycle 1 over-critical)
- $T_{\text{crit_c2}}$ (cycle 2 over-critical)

- $P_{\text{crit_c1}}$ (cycle 1 over critical pressure)
- convergence (TESPy failed)
